

## Aktia Group's climate policy

The financial sector is one of the key factors behind a successful society. Corporate responsibility is part of Aktia's updated strategy and Aktia's goal is to continue as a responsible party in both the financial markets and society. Aktia Group's success is founded on trust, which is preserved through sustainable operations, including climate change awareness. Through this climate policy, Aktia ensures that its activities take climate change into account and strengthens its long-term relationship with its customers and other stakeholders.

### Goals of the climate policy

- The goal of the policy is to set general principles for climate change awareness in Aktia's activities.
- The purpose of the climate policy is to support Aktia and its personnel in their work and decision-making by increasing awareness of climate change and climate change mitigation and adaptation.

### Purpose and scope of the guidelines

- The policy is applied to Aktia Group and its business.
- Aktia's entire personnel is covered by this policy.
- Aktia expects its business partners and suppliers to support Aktia in achieving these climate principles.

### Aktia's strategic climate principles

1. We are committed to continuously developing our awareness of climate change perspectives that are significant in terms of advice related to our products and services.
2. We are committed to improving our transparency and commitment to our customers to enable them to make informed decisions on climate change issues.
3. We are committed to developing responsible products and promoting climate-friendly measures and goal-setting in our activities.
4. We are committed to integrating and considering the climate aspect in our chosen research and analysis processes and understanding the risks and opportunities involved in the operations and sector of companies when climate change materialises in an economically significant manner.
5. We are committed to using our right as a long-term shareholder, with regard to the assets managed by Aktia Rahoitusyhtiö, to vote by proxy, participating in select General Meetings and, where possible, engaging with companies on their climate change management.

For Aktia, it is important to participate in and support international commitments that help organisations operate in an environmentally friendly manner. Aktia's commitments related to the climate are:

- CDP (formerly Carbon Disclosure Project)

- Climate Action 100+
- PRI (Principles for Responsible Investment)
- The Investor Agenda
